"Computers are incredibly fast, accurate, and stupid. Human beings are incredibly slow, inaccurate, and brilliant. Together they are powerful beyond imagination."

Shape the Future with DCA

"From learning code to building logic—DCA wasn't just a diploma; it was the upgrade my career needed."

OBJECTIVES

1. Developing Strong Core Fundamentals
2. Building Practical Programming Skills
3. Fostering Software Engineering and Database Expertise
4. Grooming for the IT Industry
5. The ultimate goal of a DCA is **employability**.
6. It condenses the essential professional skills of a multi-year computer degree into a highly focused, one-year practical runway.

Course Curriculum Overview: Year I

The Diploma in Computer Applications (DCA) is an intensive, one-year postgraduate program designed to transform graduates from any discipline into highly skilled IT professionals.

This program perfectly balances core computer science theory with high-demand, practical skills like Python programming, Web Development, and Prompt Engineering.

With dedicated laboratory sessions for every major coding and database subject, a hands-on minor project our curriculum ensures you graduate industry-ready from day one.

"Bridging the gap between theory and code."

Semester- I

- Fundamentals of Computers
- Operating System
- Operating System Lab
- MS Office Applications
- MS Office Applications Lab
- Internet of Things
- Internet of Things Lab
- Python
- Python Lab

INDUSTRY & SKILLING PARTNERS

Course Curriculum Overview: Year I

This final phase represents the peak of your academic journey. It is designed to transition you from the classroom directly into the global tech workforce or advanced research.

Rather than standard lectures, this period focuses entirely on independent execution, real-world corporate experience, and thought leadership. You will apply everything you have learned—programming, system architecture, security, and design thinking—into concrete deliverables that prove your readiness to the industry.

Semester- II

- Database Management System
- Database Management System Lab
- Web Designing
- Web Designing Lab
- Graphics Designing
- Graphics Designing Lab
- Computer Networks
- Computer Networks Lab
- Prompt Engineering
- Prompt Engineering Lab
